Nidhal Nouma

Software developer
Lutz, Florida, United States

Summary

Experienced software developer with a passion for creating innovative solutions. With six years of experience in developing and deploying high-quality software applications, I specialize in full-stack development using a wide range of programming languages, frameworks, and technologies. I have a track record of delivering solutions that exceed user expectations while adhering to best practices for security, performance, and maintainability.

Collaboration is a core strength of mine, as I thrive in cross-functional teams and excel at communicating complex technical concepts to non-technical stakeholders. My work history includes optimizing web applications and trading platform software for improved performance and user engagement. I have also developed custom trading algorithms and automated trading systems to enhance trading performance and reduce risk.

Throughout my career, I have worked closely with traders and compliance teams to ensure regulatory compliance and adherence to industry best practices. I have successfully integrated third-party solutions into web applications and trading platforms, enhancing user experience and functionality.

As a freelancer, I have honed my skills in various technologies such as HTML, CSS, JavaScript, React, Next.js, Node.js, Express, MongoDB, MySQL, PHP, Python, Docker, AWS, Google Cloud, and Firebase. My experience encompasses developing RESTful APIs, implementing C++ extensions for trading software, and contributing to the development of best practices. I actively stay updated with the latest trends and technologies in both web development and trading platform software.

Feel free to visit my profiles on Upwork https://www.upwork.com/freelancers/nidhalnouma and Freelancer https://www.freelancer.com/u/nidhalnouma for a comprehensive view of my work.

Let's connect and explore opportunities to create impactful software solutions together.

_____

Experience

Upwork
Programmer
April 2021 - Present (4 years 1 month)
remote

- Optimized web applications and trading platform software for performance and scalability, resulting in improved response times and increased user engagement.
- Developed custom trading algorithms and automated trading systems to improve trading performance and reduce risk.
- Worked with traders and compliance teams to ensure software solutions comply with regulatory requirements and industry best practices.
- Collaborated with third-party vendors to integrate their solutions into web applications and trading platforms, ensuring seamless user experience and functionality.

Freelancer.com
Programmer
September 2017 - Present (7 years 8 months)
remote

- Developed and maintained web applications using HTML, CSS, JavaScript, React, NextJs, Node.js, Express, MongoDB, MySQL, PHP, Python, Docker, AWS, google cloud, firebase, and more to meet or exceed user expectations.
- Worked on the development of trading platform software that incorporates algorithmic trading, data analysis, and risk management features using a C++ extension.
- Designed and implemented RESTful APIs to integrate third-party services into trading platforms and web applications.
- Collaborated with cross-functional teams, including designers, project managers, and traders to ensure the delivery of high-quality and user-friendly software products.
- Contributed to the development of web development and trading platform software best practices and helped mentor junior developers.

- Stayed up-to-date with the latest trends and technologies in web development and trading platform software development to ensure the use of the most efficient and effective solutions.

Education

Université de Sousse
Bachelor's degree, Electrical, Electronics and Communications Engineering · (2013 - 2016)

Lycee 2 Mars 1934
High School Diploma, Information Technology · (2011 - 2013)
